CLAIM AMENDMENTS

Claim Amendment Summary

Claims pending

- At time of the Action: Claims 1-14.

- After this Response: Claims 1-14.

Canceled or Withdrawn claims: none.

Amended claims: 1-14.

New claims: none.

Claims:

1.   (presently amended)   A   multiple-original-output ("Mopying") control system for use with a Mopy-enabled multifunction device (MFD), the system comprising:

a source-selection determiner configured to determine a source selected for a Mopy in a Mopy job, ~~wherein the source for the Mopy may be selected~~ from multiple sources on the MFD

a destination-selection determiner configured to determine a destination selected for a Mopy in a Mopy job ~~wherein the destination for the Mopy may be selected~~ from multiple destinations on the MFD;

a Mopy-job formatter configured to format a Mopy job that includes source-selecting directions for at least one Mopy in the job and destination-selecting directions for at least one Mopy in the job;

a Mopy-job transmitter configured to transmit the Mopy job to <u>the</u> ~~a~~ MFD.

2. **(presently amended)** A ~~MFD~~ <u>Mopy-enabled multifunction device (MFD)</u> comprising:

a printing engine;

multiple sources;

multiple destinations;

a receiver configured to receive a Mopy job from ~~a Mopying control system as recited in claim 1~~ <u>multiple-original-output ("Mopying") control system for use with the MFD, the system comprising:</u>

<u>a source-selection determiner configured to determine a source selected for a Mopy in a Mopy job from multiple sources on the MFD;</u>

<u>a destination-selection determiner configured to determine a destination selected for a Mopy in a Mopy from multiple destinations on the MFD;</u>

<u>a Mopy-job formatter configured to format a Mopy job that includes source-selecting directions for at least one Mopy in the job and destination-selecting directions for at least one Mopy in the job;</u>

<u>a Mopy-job transmitter configured to transmit the Mopy job to the MFD.</u>

3.   (presently amended)   A   printer/   driver   comprising   a

~~Mopying~~ ~~control~~ ~~system~~ ~~as~~ ~~recited~~ ~~in~~ ~~claim~~ ~~1~~ a   multiple-original-output

("Mopying") control system for use with the MFD, the system comprising:

     a source-selection determiner configured to determine a source

selected for a Mopy in a Mopy job from multiple sources on the MFD;

     a destination-selection determiner configured to determine a

destination selected for a Mopy in a Mopy from multiple destinations on

the MFD;

     a Mopy-job formatter configured to format a Mopy job that

includes source-selecting directions for at least one Mopy in the job and

destination-selecting directions for at least one Mopy in the job;

     a Mopy-job transmitter configured to transmit the Mopy job to

the MFD..

4.   (presently amended)   An application comprising ~~a~~ ~~Mopying~~

~~control~~ ~~system~~ ~~as~~ ~~recited~~ ~~in~~ ~~claim~~ ~~1~~ a   multiple-original-output   ("Mopying")

control system for use with the MFD, the system comprising:

     a source-selection determiner configured to determine a source

selected for a Mopy in a Mopy job from multiple sources on the MFD;

     a destination-selection determiner configured to determine a

destination selected for a Mopy in a Mopy from multiple destinations on

the MFD;

     a Mopy-job formatter configured to format a Mopy job that

includes source-selecting directions for at least one Mopy in the job and

destination-selecting directions for at least one Mopy in the job;

     a Mopy-job transmitter configured to transmit the Mopy job to

the MFD..

5.   (presently amended)   An operating system comprising ~~a Mopying control system as recited in claim 1~~ a multiple-original-output ("Mopying") control system for use with the MFD, the system comprising:

a source-selection determiner configured to determine a source selected for a Mopy in a Mopy job from multiple sources on the MFD;

a destination-selection determiner configured to determine a destination selected for a Mopy in a Mopy from multiple destinations on the MFD;

a Mopy-job formatter configured to format a Mopy job that includes source-selecting directions for at least one Mopy in the job and destination-selecting directions for at least one Mopy in the job;

a Mopy-job transmitter configured to transmit the Mopy job to the MFD..

6.   (presently amended)   A method facilitating multiple-original-output ("Mopying") control of a Mopy-enabled multifunction device (MFD), the method comprising:

specifying a source for a Mopy in a Mopy job, ~~wherein the source for the Mopy may be one of~~ from multiple sources on the MFD;

specifying a destination for a Mopy in a Mopy job ~~wherein the destination for the Mopy may be one of~~ from multiple destinations on the MFD.

7.   (presently amended)   A method as recited in claim 6, further comprising:

formatting a Mopy job, such job includes source-selecting directions for at least one Mopy in the job and destination-selecting directions for at least one Mopy in the job;

transmitting the Mopy job to <u>the</u> a MFD.

8.   (presently amended)   A computer-readable medium having computer-executable instructions that, when executed by a computer, performs ~~the method as recited in claim 6~~ <u>a method comprising:</u>

specifying a source for a Mopy in a Mopy job <u>from</u> multiple sources on the MFD;

specifying a destination for a Mopy in a Mopy job <u>from</u> multiple destinations on the MFD.

9.   (presently amended)   A   multiple-original-output ("Mopying") control system for use with a Mopy-enabled multifunction device (MFD), the system comprising:

a source-selection specifier configured to select a source for each Mopy in a Mopy job~~, wherein a source for the Mopy may be selected~~ from multiple sources on the MFD;

a destination-selection specifier configured to select a destination for each Mopy in a Mopy job~~, wherein a destination for the Mopy may be selected~~ from multiple destination<u>s</u> on the MFD.

10.   (presently amended)   A system as recited claim 9, further

comprising:

a Mopy-job formatter configured to format a Mopy job that includes

source-selecting directions for each Mopy in the job and destination-selecting

directions for each Mopy in the job;

a Mopy-job transmitter configured to transmit the Mopy job to the ~~a~~

MFD.

11.   (presently amended)   A ~~MFD~~ Mopy-enabled multifunction

device comprising:

a printing engine;

multiple sources;

multiple destinations;

a receiver configured to receive a Mopy job from ~~a Mopying control~~

~~system as recited in claim 9~~ multiple-original-output ("Mopying") control

system for use with a MFD, the system comprising:

a source-selection specifier configured to select a source for each Mopy

in a Mopy job from multiple sources on the MFD;

a destination-selection specifier configured to select a destination for

each Mopy in a Mopy job from multiple destinations on the MFD.

12. **(presently amended)** A printer driver comprising ~~a~~ ~~Mopying control system as recited in claim 9~~ a multiple-original-output ("Mopying") control system for use with a Mopy-enabled multifunction device (MFD), the system comprising.
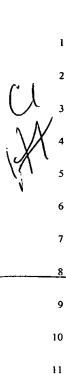

a source-selection specifier configured to select a source for each Mopy in a Mopy job from multiple sources on the MFD;

a destination-selection specifier configured to select a destination for each Mopy in a Mopy job from multiple destinations on the MFD.

13. **(presently amended)** An application comprising ~~a Mopying control system as recited in claim 9~~ a multiple-original-output ("Mopying") control system for use with a Mopy-enabled multifunction device (MFD), the system comprising.

a source-selection specifier configured to select a source for each Mopy in a Mopy job from multiple sources on the MFD;

a destination-selection specifier configured to select a destination for each Mopy in a Mopy job from multiple destinations on the MFD.

14. (presently amended) An operating system comprising a ~~Mopying control system as recited in claim 9~~ a multiple-original-output ("Mopying") control system for use with a Mopy-enabled multifunction device (MFD), the system comprising:

a source-selection specifier configured to select a source for each Mopy in a Mopy job from multiple sources on the MFD;

a destination-selection specifier configured to select a destination for each Mopy in a Mopy job from multiple destinations on the MFD.
